## What is the Goal of WISE?

WISE was formed over three decades ago with the purpose of making the Hubbard Administrative Technology broadly known and widely used. WISE addresses the very infrastructure of society by seeing to it that the principles of production and exchange are applied in a proven, well-established and systematic manner with the end result of increased prosperity, economic stability and survival for communities and entire nations.

## What Does WISE Do?

By making the Hubbard Administrative Technology available to all nations, in all languages, and to executives and staffs of all organizations of whatever type, WISE enables well-intentioned and able individuals to change the very framework of existence in their areas, and ultimately across the entire globe.

## What is the Hubbard Administrative Technology?

The Hubbard Administrative Technology encompasses the administrative works of renowned author and philosopher L. Ron Hubbard which are used in organizational, professional and private endeavors. The product of more than three decades of research, piloting and codification, this body of knowledge is the world's most comprehensive system of management and represents the first true technology of administration.

## Who Joins the WISE Membership?

WISE is an international membership organization whose members use L. Ron Hubbard Administrative Technology and embrace the responsibilities and ethical standards of WISE membership.
